Sample#	Material Description	Location of Sample in Building

* These sample results may expire after several months, please check with the disposal facility of your choice. *

I understand that all sample submissions are for disposal and curiosity purposes ONLY.
 This testing does not satisfy *WorkSafeBC* regulations or municipal permit requirements. This is not proof of non-detection of asbestos, as a proper hazardous material report prepared by a qualified consultant is required prior to any renovation or demolition work (on a pre-1990 building).
