Contact Email:	

It is the responsibility of the client to ensure that the testing conditions of the disposal facility are met.

DISCLAIMER: Please contact your preferred disposal facility for the in-house policies and procedures with regards to sample analysis and disposal. In-house policies can vary and change without notice, which may impact your ability to dispose of certain materials. Results will not be edited after testing.

Sample#	Material Description	Room/Area/Location of Sample
01		

I understand that all sample submissions are for disposal and curiosity purposes ONLY.

This testing does not satisfy *WorkSafeBC* regulations or municipal permit requirements. This is not proof of non-detection of asbestos, as a proper hazardous material report prepared by a qualified consultant is required prior to any renovation or demolition work (on a pre-1990 building).
